

THE ERA OF MATERIALS

Table of Contents

Preface	v
Acknowledgement	v
Introduction RECENT EVOLUTION OF MATERIALS IN OUR SOCIETY	
<i>R. E. Tressler, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA.</i>	
Part One: Fundamentals	
Chapter 1: THEORETICAL STUDIES OF PHASE TRANSFORMATIONS IN SOLIDS	
<i>L. Q. Chen, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	18
Chapter 2: EXPERIMENTAL STUDIES OF SOLID TO SOLID PHASE TRANSFORMATIONS IN METALS AND ALLOYS	
<i>Paul R. Howell, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	33
Chapter 3: CRYSTALLINE VS. AMORPHOUS STATE: METALS	
<i>Earle Ryba, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA ..</i>	61
Chapter 4: CRYSTALLINE AND AMORPHOUS STATES OF POLYMERS AND POLYMER BLENDS	
<i>James P. Runt and Sapna Talibuddin, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	75

Chapter 5: THE ROLE OF POLYMER SURFACES IN THIN FILM DISPLAY TECHNOLOGY	
<i>Sanat K. Kumar, and David L. Allara, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA and Thomas P. Russell, Department of Polymer Science, University of Massachusetts, Amherst, MA ...</i>	87
Chapter 6: COLLOIDS AND SURFACES IN AQUEOUS SYSTEMS	
<i>K. Osseo-Asare, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	99
Chapter 7: ELECTROCHEMISTRY	
<i>Digby Macdonald, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	121
Chapter 8: DIFFUSION IN OXIDE SYSTEMS	
<i>V. S. Stubican, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	158
Chapter 9: INTERDIFFUSION IN METALS	
<i>William R. Bitler and Suzanne Mohny, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	176
Chapter 10: AN INTRODUCTION TO POLYMER BLENDS	
<i>Michael M. Coleman and Paul C. Painter, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	194
Chapter 11: FUNCTIONAL POLYOLEFINS: SYNTHESIS AND APPLICATIONS	
<i>T. C. Chung, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA</i>	213
Chapter 12: NEW SEMICONDUCTOR MATERIALS	
<i>Jerzy Ruzyllo, Department of Electrical Engineering, III H Electrical Engineering West, Pennsylvania State University, University Park, PA</i>	237

Part Two: Applications

Chapter 13: FUNCTIONAL COMPOSITES FOR SENSORS AND ACTUATORS: SMART MATERIALS

Robert E. Newnham, Materials Research Laboratory, Pennsylvania State University, University Park, PA 259

Chapter 14: FERROELECTRICS

L. E. Cross and Susan Trolier-McKinstry, Materials Research Laboratory, Pennsylvania State University, University Park, PA 276

Chapter 15: INTEGRATED CERAMIC PACKAGING

C. A. Randall and J. P. Dougherty, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 290

Chapter 16: POLYCRYSTALLINE DIAMOND GROWTH BY CHEMICAL VAPOR DEPOSITION

Walter Yarbrough and Karl E. Spear, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 309

Chapter 17: THE SURFACE AND STRUCTURE OF GLASS

Carlo G. Pantano, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 342

Chapter 18: BIOMATERIALS

P. W. Brown, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 359

Chapter 19: TOUGHENING MECHANISMS IN CERAMICS

David J. Green, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 377

Chapter 20: NONOXIDE STRUCTURAL CERAMICS AND ADVANCED CERAMIC FIBERS

Richard E. Tressler, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 396

Chapter 21: HIGH TEMPERATURE STRUCTURAL ALLOYS AND INTERMETALLICS

Donald A. Koss, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 417

Chapter 22: AQUEOUS CORROSION

Howard W. Pickering, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 433

Chapter 23: HIGH TEMPERATURE CORROSION

George Simkovich, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 448

Chapter 24: TRANSPORT PROCESSES IN FUSION WELDING

Tarasankar DebRoy, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 463

Chapter 25: CARBON AND GRAPHITE MATERIALS

Peter Thrower, Department of Materials Science and Engineering, Steidle Building, Pennsylvania State University, University Park, PA 486

Subject Index 504
