

PENNSYLVANIA ACADEMY OF SCIENCE
JOURNAL INFORMATION FOR AUTHORS

EDITORIAL POLICY AND FORMAT

The *Journal* of the Pennsylvania Academy of Science publishes original papers, research notes, commentary, and review articles in the natural, physical, engineering, and social sciences. All papers must discuss the relevance of the data presented and a clear interpretation of its meaning in view of current knowledge of the discipline concerned. Helpful references for the author are: (1) Day, R.A. 1983. *How to write a scientific paper*. 2nd ed. ISI Press, Philadelphia, xv + 181 pp.; (2) O'Connor, M. and F.P. Woodford. 1976. *Writing scientific papers in English*, Elsevier, Amsterdam, vii + 108 pp.; (3) MacGregor, A.J. 1979. *Graphics simplified*; and (4) *How to plan and prepare effective charts, graphs, illustrations, and other visual aids*, University of Toronto Press, Toronto, 1-64 pp.

Authors are requested to examine recent issues of the *Journal* in order to conform to the general style of the journal. Papers are accepted for consideration at any time. Submitted manuscripts are accepted for review with the understanding that the same work has not been published, copyrighted or submitted for publication elsewhere, and that all persons cited as a personal communication have consented to be cited. Additionally, submission of the manuscript is a representation that all the authors for the said manuscript and the institution where the research was carried out have approved its publication. Signed authorization will be required as appropriate. Authors are billed for page charges to partially defray the costs of publishing. Page charges are mandatory.

Submit: (1) 4 copies of text, tables and illustrations (original and 3 duplicates; copies on heavy slick paper are not acceptable), (2) disk with computer file(s), indicating the type of file(s) saved to disk (Microsoft Word and text formats preferred), save scans or graphic images in Tiff, EPS or JPEG format independent of the text document (we cannot access images if they are imbedded in the text file) and (3) names, addresses, and the professional area of expertise of 4 possible reviewers. The reviewers must be outside the author's institution, possess a knowledge of current research in the area of the study, and generally be professionally qualified to referee the paper. The peer reviewing process is the Editor's responsibility, and the reviewers are selected at the discretion of the Editor.

All authors are requested to conform to the following:

1. *General Format*. All papers should be typed, double spaced, and on good quality 8.5 x 11-inch (21.5 x 28 cm) bond paper, with 3 cm margins all around. *Do not use single spacing anywhere* (including Literature Cited), and do not use erasable bond paper. Normally, manuscripts will be organized as follows: (1) an unnumbered cover sheet with Title, Authors, their institutions and addresses, and name, address, and telephone number of the author to receive proof, (2) an unnumbered sheet with an Abstract, (3) Introduction, (4) Materials and Methods, (5) Results, (6) Discussion, (7) Acknowledgments, and (8) Literature Cited. All pages of the text, Introduction through the Literature Cited, are to be numbered, and the names of authors should appear in the upper right-hand corner of each page. The text should begin in the middle of the first numbered page.
2. *Headings*. All headings are in CAPITAL letters and centered.
3. *Title*. Brief and to the point. It should inform the reader of the subject of the paper.
4. *Byline*. Include author's name, name of institution, department, address and zip code.
5. *Abstract*. A clear and concise paragraph summarizing the paper. Normally, it will be in lieu of a formal summary section.
6. *Introduction*. The introduction should be concise and offer only that information necessary to orient the reader to the purpose and scope of the paper. It should state the reasons for the work and cite only published literature relevant to the subject.
7. *Materials and Methods*. Describe materials, methods, and equipment. Avoid repeating previously published details, unless modifications are extensive. The necessity of conciseness should not lead to omission of important experimental details necessary for others to repeat the work. When applicable, describe the experimental design and justify its use.
8. *Results and Discussion*. The Results section is a clear and concise account of the findings. Data should be presented in the most efficient manner, either in text, tables, or illustrations. All tables and illustrations must be referenced in the text. The Discussion section should extend or contradict current published information on the subject. Limit the discussion to the relevant subject and avoid speculation.
9. *Acknowledgments*. These should be as brief as possible.
10. *Literature Cited and Footnotes*. Except for title and author reference at the beginning of the paper, and superscript notation in tables, do not use footnotes. Create separate Appendices or an Endnotes section if additional supplementary text material is required. Place Endnotes section just before the Literature Cited section. Number each endnote within the Endnote section using Arabic numbers in the order in which they are referred to in the other sections of the manuscript. In other sections of the manuscript, place endnotes reference numbers in parentheses, and use the text style of type and not superscript. Place appendices after the Literature Cited section. Include a Literature Cited section: list references in alphabetical order by first author. Include only published references cited in the manuscript; unpublished work normally will be cited as personal communication (pers. comm.) in other sections of the manuscript, e.g., J.R. Halma (pers. comm.) or (J.R. Halma, pers. comm.). List all authors and full citation in the Literature Cited section. Use the most recent issue of the recognized abstracting authority to determine the correct abbreviations of periodical names (e.g., for biology use BIOSIS, Bioscience Information Service, Philadelphia, PA). If in doubt do not abbreviate serial names. Use the following format and style for the Literature Cited section: Journal-Monmonier, [M. 1987. Title. J. Pa Acad. Sci. 62:73-77.](#)

Book (Select pages)-Snedecor, G.W. and [W.G. Cochran. 1976. Statistical Methods](#). The Iowa State University Press. Ames, IA, 237-238.

Book (Complete work)-Snedecor, G.W. and W.G. Cochran. 1976. Statistical Methods. The Iowa State University Press. Ames, IA, xix + 593 pp.

In all but the Literature Cited section, cite all works by author and year. For works by one or two authors, include names in each citation, e.g., (Smith and Reif 1984), or, if authors' names are used in the text-Smith and Reif (1984); for works by three or more authors, use et al. after the first author, e.g., (Gur et al. 1983), or, if the authors' names are used in the text-Gur et al. (1983). Research Notes with fewer than five references should be cited within the other sections of the manuscript thereby eliminating the need for a Literature Cited section. When references are cited within the text of other sections, include authors by last name only, and do not use et al. in the citation, e.g., for a journal article-(Genys, Harman and Fuller 1984, Proc. Pa. Acad. Sci. 58:67-69), or, if authors are used in the text-Genys, Harman and Fuller (1984, Proc. Pa. Acad. Sci. 58:67-69); for a book-(Snedecor and Cochran, 1976, Statistical Methods, The Iowa State University Press, Ames, IA 237-238), or, if authors are used in the text-Snedecor and Cochran (1976, The Iowa State University Press, Ames, IA, 237-238).

11. *Research Notes.* Papers submitted as short communications with an abstract are classified as Research Notes. Research Notes must contain the same basic quality of content and order of presentation as more substantial papers having content separated by section. Citations must follow the same format as articles.

12. *Tables and Illustrations.* Tables must have a title, be numbered in Arabic numerals, and be typed on separate sheets. Drawings and

graphs must be drawn in solid black ink on good quality white bond paper. Photographs are to be good quality glossy prints with high contrast. All illustrations must be numbered and lettered using a mechanical lettering device, pressure transfer letters or computer printer. Make lettering large enough to be legible if reduction is necessary. Typewritten or dot matrix/computer lettering *is not* acceptable for illustrations. Computer generated images or scans should be saved as Tiff, EPS or JPEG files and may be supplied on disk (standard floppy disk, Zip, Jazz or CD) with a good laser or ink jet paper printout of the same. Author's name and figure number must be written on the back of each illustration; use a soft pencil for identification. Type the legends for all illustrations in consecutive order on a separate sheet.

13. *Page Charges, Proofs and Reprints.* Authors are charged per printed page to help the Academy defray the costs of publication. Page charges are mandatory. Galley proofs will be sent to authors for checking; they must be returned to the Editor within a week after receipt.

14. *Editorial Policy.* Every paper is reviewed by the Editor and selected professional referees. Manuscripts will be returned or rejected if considered unsuitable for publication.

15. *Manuscripts and Correspondence.* Address all inquiries relating to publication in the *Journal* to the Editor: Shyamal K. Majumdar, Department of Biology, Lafayette College, Easton, PA 18042. Phone: 610-330-5464; FAX 610-330-5705; [e-mail: Majumdas@Lafayette.edu](mailto:Majumdas@Lafayette.edu)
